

UPDATED: 14th May 2008

IMPORTANT INFORMATION

What is Torrent Database?

Torrent Database is a glorified database of favourites containing most of the torrent sites available on the net, along with other added additions.

What about Spyware, Adware etc?

This application doesn't contain any spyware, adware, or viruses, please feel free to scan with any anti-virus software, this software has been advertised on many freeware sites and undergoes a scan of most anti-virus applications before being advertised.

Who made this software?

My name is jf3000, I spend my time with programming applications in vb.net and c++, with this time I also program applications for the c520 Mio.

I'm about to run the msi file, what will it install?

The msi file will install the following components which are required to run the main application, if you run the main application and encounter a file that is missing, you can find the file via Google and then download the file and register the file by double clicking the dll or ocx or open with option and choose the regsvr32.exe application used to register these files. The regsvr32.exe is located in your c:\windows\system32 folder by default.

msinet.ocx
mswinsck.ocx
mswinsck.dll
comcat.dll
asycfilt.dll
oleaut32.dll
olepro32.dll

TS.exe
Update.exe

settings.cfg

The TS.exe is the main application for Torrent Database and the Update.exe is used for updating the main application and also downloading the helpful and any other tools which you want to download (optional).

The settings.cfg is the configuration file that downloads automatically once you run the Update.exe. The config file contains the data on when your last update was, if you miss an update and want to re-download the update, simply delete this file.

Updates, How?

To begin any of the updates, simply choose Update Database from the Help menu, or press F9.

Ads, why?

When you first run the application you will notice a few ads, the top advertisement is my own ad, the bottom ad is a paid advertisement from customers whom choose to advertise with us. The bottom ad is a link to our prices for advertising, which are generally cheap.

The Last Blurb!

Any software that you download please remember to support the writers of the software and purchase the software, or if you own the software, please remember that anything you download must be deleted within 24 hrs. We're not held responsible for anything you download, we only provide the website links which can be clearly seen so you know exactly where you're going. Most of all have fun surfing the internet.

Greets to Dunky, Frosty and my loved one.
